De Tomaso Pantera Sold

Sold

1971 De Tomaso Pantera

A beautiful and very original example of an early chrome bumper Pantera. Red with Black. numbers matching and correct Cleveland 351 and ZF transaxle.

This example stands out as being structurally excellent having spent much of its life in the gentle Californian climate and showing 35000 miles covered. Complete recent service including new main bearings, all fluids and air con recharge carried out.

A few practical improvements include relocating the spare tyre to the front, freeing up rear luggage space and installation of discrete high intensity driving lights for evening safety. An increasingly rare opportunity to acquire a properly sorted and unmolested early pre L, Tom Tjaarda designed De Tomaso Pantera.
